SCM Studio
Design your world.

As we specialize in designing and building custom sites the final site will integrate a third party site to handle ecommerce trac. The Studio is happy to provide assistance in guiding decision making, however the final decision will be the Client's own.

We suggest that you pick a solid hosting company so that they can ensure that your web- site will be able to handle any future traffic increase and that the website will be protected against external attacks. Alternativley the Studio can handle the hosting service and can make changes and updates to the site on the Client's behalf. This service will incur a small monthly fee to cover the hosting expenses.
